RE: 2010 CALIFORNIA RICE CROP TESTING

This letter is issued with reference to Tim's letter addressed to Vic Anand of CALAGRI and me with a request to issue final report on sampling and testing results. Rice GMO testing was performed at OMIC USA, Inc., DNA laboratory in Portland as per mutually agreed testing protocol PCR based 35S-Bar test to 0.01% detection level at a 95% confidence level using Bayer CropScience protocols PGS0494 / PGS0476 with standard turnaround. Testing costs was \$100.00 per sample as per previously agreed terms and conditions including cost.

A total of nine (9) samples (rough rice) were tested and individual test results have been issued on a weekly basis. We are glad to report to you that there was no detection of any traces of liberty link LL601. Enclosed with this letter is a summary report containing detailed information of the testing results.

Thank you for the opportunity to work together in this project.

Sincerely,

Chong Singsit
